

and ordered to be printed, and that the President's message be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The message of the President is as follows:

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith the Treaty Between the Government of the United States of America and the Government of the Republic of Nicaragua Concerning the Encouragement and Reciprocal Protection of Investment, with Annex and Protocol, signed at Denver on July 1, 1995. I transmit also, for the information of the Senate, the report of the Department of State with respect to this Treaty.

The bilateral investment treaty (BIT) with Nicaragua is the fifth such treaty signed between the United States and a country of Central or South America. The Treaty will protect U.S. investment and assist Nicaragua in its efforts to develop its economy by creating conditions more favorable for U.S. private investment and thereby strengthening the development of its private sector.

The Treaty is fully consistent with U.S. policy toward international and domestic investment. A specific tenet of U.S. policy, reflected in this Treaty, is that U.S. investment abroad and foreign investment in the United States should receive national treatment. Under this Treaty, the Parties also agree to customary international law standards for expropriation. The Treaty includes detailed provisions regarding the computation and payment of prompt, adequate, and effective compensation for expropriation; free transfer of funds related to investments; freedom of investments from specified performance requirements; fair, equitable, and most-favored-nation treatment; and the investor's freedom to choose to resolve disputes with the host government through international arbitration.

I recommend that the Senate consider this Treaty as soon as possible, and give its advice and consent to ratification of the Treaty, with Annex and Protocol, at an early date.

The PRESIDING OFFICER. That's correct.

ANTIMICROBIAL RESISTANCE

Mr. KENNEDY. Mr. President, I commend my friend from Mississippi, Senator COCHRAN, and also Senator FRIST, for the introduction of the amendment. I welcome the opportunity to join with them in the hope that the Senate will accept that amendment because this amendment is focused on one of the very significant and important public health challenges that we face as a Nation, and that is antimicrobial resistance.

Microbes resistant to antibiotics are a major health threat. The World Health Organization reports that antibiotic-resistant infections acquired in hospitals kill over 14,000 people in the United States every year—that's almost two persons every hour, every day, every year. Unless we take action, drug-resistant infectious diseases will become even more widespread in the United States and kill even larger numbers of patients.

Infections resistant to antibiotics are extremely expensive to treat. It is a hundred times more expensive to treat a patient with drug-resistant TB than to treat a patient with drug-sensitive TB. The National Foundation for Infectious Diseases has estimated that the total cost of drug-resistant infections in this country is \$4 billion a year—and this cost will rise as resistant microbes become more common.

The amendment takes an important step to address this health crisis by giving the nation more tools to win the battle against antimicrobial resistance.

Overuse of existing antibiotics contributes heavily to the problem of antimicrobial resistance. Patients often demand antibiotics and doctors often prescribe them for conditions in which they are clearly ineffective. We need to educate patients and medical professionals in the more appropriate use of antibiotics.

The nation's public health agencies are under-equipped to monitor and combat resistant infections. Many public health agencies lack even such basic equipment as a fax machine, and cannot even conduct simple laboratory tests to diagnose resistant infections. We need to strengthen the capacity of public health agencies to diagnose, monitor, and deal effectively with outbreaks of resistant infections.

Many patients acquire resistant infections in hospitals. Children, the elderly and persons with reduced immune systems are particularly at risk. We can do more to prevent the spread of resistant infections by strengthening infectious disease control programs in hospitals and clinics.
